**SUBJECT: Kamoy Engineering, industrial Estate, Marsa HMR 15, Malta**

Kamoy engineering Services have been utilised by Crosco, many times during previous 5 years for engineering and machining services in Crosco base Malta.

Kamoy services, among other, had been utilised for different scope of work on our offshore rig equipment.

On our great pleasure, some of the major jobs were made succesfully which included:

- Detailed and sensitive machining services of offshore drilling mud pump parts
- Modifications on anchor lines exchange equipment
- Repairs on BOP equipment

All jobs were performed very professionally, promptly and most important, in good quality.

I would recommend with no limitations use of Kamoy engineering services in offered scope of work.

Kresimir Turkovic
